Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

I. Species of the embodiment disclosed on page 8, lines 12-25; in particular, wherein the recording duty ratio detecting means comprises a plurality of recording duty ratio detecting means, the light beam intensity modulating means comprises with a plurality of light beam intensity modulating means associated respectively with recording ratios detected, to eliminating beats.

II. Species of the embodiment disclosed on page 8, lines 25-27, page 9, lines 1-7; in particular, modulating the brightness of the light beams based on the average recording duty ratio to allow beats.

III. Species of the embodiment disclosed on fig. 9; in particular, a recording duty ratio is detected by duty ratio detecting means.

Note; the difference of the three species are I) the recording duty ratio detecting means detects a plurality of recording duty ratios (for example claim 9); II) an average recording duty ratio is detected (for example claim 10); and III) the recording duty ratio detecting means detects a recording duty ratio (for example claim 1).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to King Y. Poon whose telephone number is 571-272-7440. The examiner can normally be reached on Mon-Fri 8:00-4:30.
